Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 15 recites the limitation "the conveyor belt" in ln 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-12, 16-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Pruitt (5566535).

Pruitt discloses:

In re cls. 1-2, 10: A control assembly which is disposed relative to the pull-type windrower remotely (col. 2, ln 34-35; col. 4, ln 9), a housing of the controller (fig 4), a harness arrangement configured to electrically connect the controller (col. 8, ln 25-47);

Art Unit: 3671

In re cls: 3-9, 11-12, 16-20: connectors, hydraulic lines, switches, valves to control the lifting, steering etc... (col. 5-9, col. 10, ln 1-12).

As applied to claim(s) 21-23, in view of the structure disclosed/taught by Pruitt, the method of operating/using the device is inherent since it is the normal and logical manner in which the device is used.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pruitt (5566535).

Pruitt discloses that the remote control, from the seat of the operator, of functions of the towed windrower (or cutter or swather) is not limited to tilting the angle, cutting crop, raising or lowering etc... but can encompass any other functions, therefore as recited in col. 10, In 13-24, any other well known different functions can be encompassed, such as controlling conveyor drive assembly, speed of the windrower and so on.

Examiner takes Official Notice that since Pruitt teaches that the remote control means can be used for functions other than what is illustrated, and also as the Applicant proves this by reciting variety of different applicability for the control assembly, therefore controlling the operational functions of any known device would have been well within the skill of one familiar in this art at the time of the invention was made.
